

ONE STOP SOLUTION FOR REPRODUCTIVE HEALTH NEEDS...

Pre Conception

Carrier Screening 787 Genes

During Pregnancy

First Trimester Screening

- Dual marker screening: β HCG, PAPP-A
(Technique: Software- Lifecycle/ FastScreen /SSdwLab6.0/ PRISCA5.3)
- Dual + Pre-eclampsia risk (β HCG, PAPP-A, PIGF)
- MBFD/NIPT (min 10 weeks)

Second Trimester Screening

- Triple marker Screening • MBFD/NIPT
- Quadruple screening (AFP, β HCG, UE3, Inhibin A)

Third Trimester Screening

- MBFD/NIPT
- Pre-eclampsia Predictor (sFLT-1: PIGF RATIO) panel

Prenatal Diagnostics

- Karyotyping • FISH • MLPA,
- Chromosomal microarray (CMA), Sanger sequencing
- Whole exome/ Clinical exome sequencing

Post Delivery

Postnatal Diagnostics

- Hemoglobinopathy/NBS • Newborn screening
- Biochemical tests • TMS • Karyotyping • FISH • CMA
- Whole exome/ Clinical exome sequencing
- Sanger sequencing

Infertility/ Recurrent Pregnancy Loss/IVF

Recurrent Pregnancy Loss

- BOH/Autogen panel • APLA • Karyotype
- Carrier screening • CMA • Infertility comprehensive panel
